

ANDREA ROMERA COSTA

FRONTEND DEVELOPER · REACT · TYPESCRIPT · NEXT.JS

[Github](#) · [LinkedIn](#) · [Portfolio](#) · a.romeracosta@gmail.com

Spain · Open to opportunities across Europe

PROFILE

Frontend Developer focused on React, TypeScript and Next.js, with hands-on experience building PWAs, reusable component systems and production-oriented web applications. Particularly interested in frontend architecture, performance, resilient client-side systems and maintainable UI.

EXPERIENCE

Freelance Frontend Developer at Studio Vi · [Project](#)

September 2024 - January 2025

- Built animation-rich conversational interfaces for an AI-powered virtual agent deployed across **kiosk and web environments**, translating detailed UI specifications into production-ready HTML and CSS.
- Developed a **JSON-based configuration system** allowing non-technical users to modify chatbot behaviour through contextual rules.
- Designed explicit interaction states for **user presence, proximity and inactivity** using browser APIs including **Camera and Web Speech**.

SELECTED PROJECTS

Golden Core — Next.js PWA · [Live Demo](#)

2025 · Next.js · React · TypeScript · Zustand · Tailwind · Node.js · PostgreSQL

- Built an event gallery with **Next.js App Router, React 19 and TypeScript**, implementing **Node.js route handlers** and a **PostgreSQL-backed REST API**, with **Zustand stores** separating session, media UI and event state.
- Designed a **resilient media-upload pipeline** with direct **Vercel Blob** uploads, scoped server tokens, UUID-based idempotency, optimistic UI, progress tracking, cancellation, retries and up to **3 concurrent uploads**.
- Implemented **cross-reload upload recovery with IndexedDB** and a custom **Service Worker** with dedicated caching strategies for offline navigation, assets, media and event data.
- Built a two-column **masonry gallery** for photos and videos with lazy loading and progressive rendering, minimizing layout shifts during media loading.
- Implemented **JWT-based authentication with httpOnly cookies and bcrypt password hashing**, centralizing token verification in a reusable authentication helper.
- Optimized client-side media processing with **Canvas, EXIF handling and AVIF/WebP**, backed by **118 Vitest tests** including **property-based testing** with fast-check.

Development workflow: AI-assisted, spec-driven development using formal requirements and design specifications.

Azeriand's Library — React Design System · [Website](#)

2025 · React · TypeScript · Tailwind · Vite · Storybook

- Designed and published a reusable **React component library** with 14 components, built around a shared Card primitive and distributed as an npm package with **Storybook** documentation.
- Built a **polymorphic Card component** using **TypeScript generics**, with Context-based light/dark theming and design tokens.
- Configured ESM/UMD builds, TypeScript declarations and CSS injection with **Vite**, with automated Storybook deployment through **GitHub Actions**.

My Portfolio — Next.js / Strapi · [Live Site](#)

2025 · Next.js · React · TypeScript · Strapi · Tailwind

- Built a **statically generated portfolio** using **Next.js App Router**, React Server Components and Strapi, with `generateStaticParams` for pre-rendered content.
- Developed a **build-time image pipeline** and automated static deployment through GitHub Actions and **GitHub Pages**.

Fitness App — React SPA · [Live Site](#)

2024 · React · Vite · JavaScript · Tailwind · MUI

- Built a **React SPA** with **7 routed views** and an in-house component library, using Context API and persistent localStorage state to simulate the backend during demos.
- Developed a reusable native **HTML5 drag-and-drop** hook for immutable item reordering across two feature views, with automated deployment through **GitHub Actions**.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Sass, MUI

Backend: Node.js, Next.js Route Handlers, PostgreSQL, SQL, JWT

Architecture: App Router, Server/Client Components, Zustand, Context API, PWA, offline-first

Web APIs: IndexedDB, Service Workers, Canvas API, Fetch, AbortController, Web Speech API

Testing & Tooling: Vitest, fast-check, Storybook, Vite, ESLint, Git, GitHub Actions, Vercel

EDUCATION

Meta — Front-End Developer Professional Certificate · Coursera

LANGUAGES

Spanish · Catalan · English
